

SlabMaster New Subscriber Onboarding Checklist & Initial Setup Guide

This document defines the comprehensive onboarding checklist and step-by-step procedure for setting up a brand-new countertop fabricator or regional enterprise on SlabMaster.

Part 1: New Subscriber Information Checklist

Before initiating tenant provisioning in SlabMaster, the implementation team must gather the following prerequisite assets, credentials, and data points from the subscriber organization.

NEW SUBSCRIBER PREREQUISITE INFORMATION GATHERING

1. Organization & Security Profile (Tenant Domain, Logo, Entra ID / SSO)
2. Regional Facilities & Operating Hours (Fabrication Plants, Timezones)
3. Crews, Machines & Assignees (Sawjet Lines, CNCs, Laser Techs, Installers)
4. Activity Pipeline & Lead Times (Template → CAD → Saw → Polish → Install)
5. Material & Slab Catalog (Colors, Thickness, Bundles, Remnant Rules)
6. Builder Accounts, Subdivisions & Lots (Customer Master Data & ERP IDs)
7. Forms, QA Checklists & Table Matrix Sheets (Sign-offs, Cutouts, Sinks)
8. ERP / SAP Accounting Connection (API Tokens, Webhooks, WBS Mapping)

1. Organization & Tenant Identity

- ☐ **Subscriber Legal & Display Name:** Full corporate entity name (e.g. `GraniteCraft Fabrication Inc.`).
- ☐ **Custom Domain / Subdomain:** Desired tenant domain (e.g. `granitecraft.com` or `granitecraft.slabmasterapp.com`).
- ☐ **Corporate Branding Assets:**
 - High-resolution SVG / PNG logo (Base64 transparent for dark & light UI modes).
 - Primary corporate hex color (e.g. `#2563eb`).
- ☐ **Identity & Access Management (SSO):**
 - Auth Mode: `EMAIL_PASSWORD`, `ENTRA_ID`, or `HYBRID`.
 - If Microsoft Entra ID (Azure AD): Entra Tenant ID, Application (Client) ID, and OAuth Secret.
 - Designated Initial Super Admin Email: Primary technical administrator (e.g. `admin@granitecraft.com`).

2. Regional Fabrication Facilities (Plants)

- ☐ **Region Codes & Names:** e.g. ATL (Atlanta Metro Hub), PHX (Phoenix Metro Hub).
 - ☐ **Physical Plant Addresses:** Street address, city, state, zip for shipping/receiving and GPS center.
 - ☐ **Local Timezones:** e.g. America/New_York , America/Phoenix , America/Chicago .
 - ☐ **Operational Calendars & Holidays:** Standard workdays (e.g. Mon-Fri 06:00-16:30) and annual company holiday closure schedule.
-

3. Fabrication Stations & Field Mobile Crews (Assignees)

- ☐ **Shop Floor Cutting Machinery:**
 - Primary CNC Sawjets (e.g. Sawjet Line 1 - BACA Robo SawJet , Sawjet Line 2).
 - CNC Routers & Edge Polishers (e.g. Marmo Meccanica LCV 711 , Park Industries Titan).
 - ☐ **Field Measurement Personnel:**
 - Dedicated Laser Templating Technicians (e.g. Crew 1 - Laser Tech (ATL)).
 - Tablet hardware models (iPad Pro, Surface Pro with Proliner or LT-2D3D Laser).
 - ☐ **Installation & Delivery Fleets:**
 - In-house Install Crews (e.g. Install Crew 4 (ATL) , 2-person truck).
 - Subcontractor Partner Crews & insurance expiration tracking dates.
 - Warranty & Service Technicians (e.g. Field Repair Tech - Dave (ATL)).
-

4. Production Activity Pipeline & Sequencing Rules

- ☐ **Lifecycle Activity Steps:** Define standard milestones:
 1. Digital Laser Template (Duration: 90 mins, Phase: TEMPLATE)
 2. CAD Engineering & Slab Matching (Duration: 120 mins, Phase: ENGINEERING)
 3. CNC Sawjet Cutting (Duration: 180 mins, Phase: FABRICATION)
 4. Edge Polishing & Quality Miter (Duration: 120 mins, Phase: FABRICATION)
 5. Field Installation & Seaming (Duration: 240 mins, Phase: INSTALL)
 6. Superintendent Sign-off & QA (Duration: 45 mins, Phase: INSPECTION)
 - ☐ **Activity Dependencies & Lead Times:** Minimum working day buffers between steps (e.g., Saw cutting occurs ≥ 2 business days after Template approval; Install occurs ≥ 3 business days after Saw cutting).
-

5. Material Catalog & Inventory Configuration

- ☐ **Material Categories:** Granite, Quartz, Quartzite, Marble, Porcelain, Solid Surface.

- ☐ **Color & Brand Catalog:** Manufacturer brand names (Cambria, Silestone, Caesarstone, MSI) and color codes.
 - ☐ **Standard Slab Dimensions:** Average length, height, square footage (e.g., $126" \times 63" = 55.13 \text{ sq ft}$), and thickness (2cm, 3cm).
 - ☐ **Remnant Policy:** Minimum square footage threshold for generating reusable warehouse remnants vs. scrap disposal (e.g., $\geq 15 \text{ sq ft}$ or $30" \times 30"$).
 - ☐ **Warehouse Rack / Bin Locations:** Aisle, Rack, and Bay nomenclature (e.g., Rack A-04 , B-12 , Showroom Staging).
-

6. Customer Master Data (Builder Accounts, Subdivisions & Lots)

- ☐ **Builder Accounts:** Top-level homebuilders or commercial contractors (e.g., Lennar, Pulte, Toll Brothers, Century Communities).
 - ☐ **External ERP Account Codes:** SAP Customer ID (KNA1 KUNNR , e.g. SAP-CUST-126954).
 - ☐ **Subdivisions / Communities:** Active neighborhood job sites with superintendent contacts and gate access codes.
 - ☐ **Active Lots & Elevation Plans:** Master lot numbers, physical addresses, and floor plan models (e.g., Plan 4200 - Cambridge Craft).
-

7. Form Packets, QA Checklists & Table Matrix Sheets

- ☐ **Pre-Installation Field Measure Checklists:** Cabinet levelness verified, electricity active, sink on-site.
 - ☐ **Custom Attribute Overrides:** Builder-specific required fields (e.g. Cutout Polish Grade , Splash Height: 4-inch vs Full-Height).
 - ☐ **Room Configuration Matrix:** Sub-table column definitions for room-by-room stone accounting (Room Name, Material, Edge Profile, Linear Feet, Sink Cutout Qty).
 - ☐ **Builder Sign-Off & Acceptance Document:** Digital sign-off waiver terms and warranty acknowledgment.
-

8. ERP / SAP Accounting Integration Credentials

- ☐ **ERP System Type:** SAP S/4HANA, SAP ECC 6.0, NetSuite, QuickBooks Enterprise, or Moraware migration.
- ☐ **External ID Standardization Strategy:** Standard nomenclature for Accounts (SAP-CUST-...), Communities (SAP-COMM-...), Lots (SAP-LOT-...), Jobs (SAP-SO-...), and WBS Milestones (SAP-WBS-...).
- ☐ **Outbound Webhook Destination URL:** Endpoint to receive CDC completion callbacks and sign-off events.

Part 2: Step-by-Step Initial Setup Guide

Follow this chronological sequence to configure a newly provisioned SlabMaster subscriber tenant from zero to live production.

CHRONOLOGICAL SUBSCRIBER ONBOARDING SEQUENCE

STEP 1: Tenant Provisioning & Security (Domain, Entra ID SSO, Admin Account)
STEP 2: Configure Operating Regions, Plants & Calendars
STEP 3: Register Fabrication Stations & Field Crews (Assignees)
STEP 4: Build Activity Types, Sequencing Dependencies & Lead Times
STEP 5: Load Material Catalog & Initial Slab Inventory with Barcodes
STEP 6: Setup First Builder Account, Subdivision & Lot Site
STEP 7: Configure Table Matrix Sub-Grids & Digital Form Templates
STEP 8: Create First Job (Work Order), Allocate Slabs & Schedule Milestones
STEP 9: Test Shop Floor Kiosk Cut List & Field Mobile Tablet Sign-Off
STEP 10: Generate API Tokens & Establish Two-Way ERP Outbound Synchronization

Step 1: Tenant Provisioning & Security Configuration

1. Navigate to the Super Admin provisioning portal or execute backend subscriber onboarding:
 - Enter Company Name: `GraniteCraft Fabrication Inc.`
 - Assign Tenant Domain: `granitecraft.com`
 - Upload transparent company logo (renders in global header and PDF cut tickets).
2. Configure **Authentication Provider**:
 - If using Microsoft Entra ID: Enter `Entra Tenant ID` and `Entra Client ID`. Enable Single Sign-On (SSO).
 - If using Hybrid / Local: Create the initial Subscriber Administrator account (`admin@granitecraft.com`) with a temporary secure credential.
3. Verify the tenant status is set to `ACTIVE` .

Step 2: Configure Operating Regions, Plants & Calendars

1. Open **Settings** → **Regional Facilities**:
2. Click + **Add Region**:
 - Region Name: `Atlanta Metro Hub`
 - Region Code: `ATL`

- Time Zone: `America/New_York`
- Set as **Default Region**: Yes.

3. Configure **Company Holidays & Work Hours**:

- Define standard operating hours: `06:30 - 16:00 Monday - Friday` .
- Add national and company closure holidays (e.g. New Year's Day, Memorial Day, Labor Day, Thanksgiving, Christmas). The SlabMaster auto-scheduler will skip these dates when scheduling job activities.

Step 3: Register Fabrication Stations & Field Crews (Assignees)

1. Open **Settings → Assignees & Crews**:

2. Register shop floor cutting machinery:

- Machine 1: `Sawjet Line 1 (ATL)` | Color: `#8b5cf6` (Purple) | Station Type: Sawjet.
- Machine 2: `CNC Router Line 2 (ATL)` | Color: `#ec4899` (Pink) | Station Type: Router.

3. Register field personnel:

- Template Tech: `Crew 1 - Laser Tech (ATL)` | Color: `#3b82f6` (Blue).
- Installation Team: `Install Crew 4 (ATL)` | Color: `#10b981` (Emerald).
- Warranty Service Tech: `Field Repair Tech - Dave (ATL)` | Color: `#f59e0b` (Amber).

4. Assign each crew to their designated regional operating facility (`ATL`).

Step 4: Build Activity Types, Sequencing Dependencies & Lead Times

1. Navigate to **Settings → Activity Types & Pipeline**:

2. Create the core fabrication lifecycle activities:

- **Template**: Name = `Digital Laser Template` | Phase = `TEMPLATE` | Duration = `90 mins` | Assignee = `Crew 1 - Laser Tech (ATL)` .
- **CAD Match**: Name = `CAD Programming & Slab Matching` | Phase = `ENGINEERING` | Duration = `120 mins` .
- **CNC Saw**: Name = `CNC Sawjet Cutting` | Phase = `FABRICATION` | Duration = `180 mins` | Assignee = `Sawjet Line 1 (ATL)` .
- **Edge Polish**: Name = `Edge Polishing & Quality Miter` | Phase = `FABRICATION` | Duration = `120 mins` .
- **Field Install**: Name = `Field Installation & Seaming` | Phase = `INSTALL` | Duration = `240 mins` | Assignee = `Install Crew 4 (ATL)` .
- **Super Sign-off**: Name = `Superintendent Sign-off & QA` | Phase = `INSPECTION` | Duration = `45 mins` .

3. Set **Activity Dependency Rules**:

- Link **CNC Sawjet Cutting** $\rightarrow$ After **Digital Laser Template** (+2 working days buffer).
 - Link **Field Installation** $\rightarrow$ After **CNC Sawjet Cutting** (+3 working days buffer).
 - Link **Superintendent Sign-off** $\rightarrow$ Same Day as **Field Installation**.
-

Step 5: Load Material Catalog & Initial Slab Inventory

1. Open the **Slab Inventory** tab.

2. Click + **Add Material / Slab Batch**:

- Material Name: **Calacatta Gold Quartz**
- Material Category: **Quartz**
- Thickness: **3cm**
- Finish: **Polished**
- Standard Slab Size: **126" x 63"** (\$55.13\text{ sq ft}\$)
- Supplier / Distributor: **MSI Stone Atlanta**

3. Enter Initial Slabs into the Warehouse:

- Slab Barcode: **SLB-ATL-2026-0041** | Block / Lot: **LOT-9921** | Location: **Aisle 2 - Rack B-04** | Status: **Available**.
- Slab Barcode: **SLB-ATL-2026-0099** | Block / Lot: **LOT-9921** | Location: **Aisle 2 - Rack B-05** | Status: **Available**.
- Slab Barcode: **SLB-ATL-2026-0104** | Block / Lot: **LOT-9922** | Location: **Aisle 3 - Rack C-01** | Status: **Available**.

4. Verify slabs appear in the inventory grid with automated status indicators (**Available** , **Allocated** , **Consumed**).

Step 6: Setup First Builder Account, Subdivision & Lot Site

1. Open the **Accounts** tab:

◦ Click + **New Account**:

- Account Name: **LENNAR HOMES OF GEORGIA - 126954**
- External ERP ID: **SAP-CUST-126954**
- Account Code: **LNAGA**
- Billing Address: **1000 Holcomb Woods Pkwy, Roswell, GA 30076**

2. Drill into the Account and click + **Add Subdivision / Community**:

- Community Name: **AUSTIN PARK AT HIGHLAND (LNAGA)**
- External ERP ID: **SAP-COMM-LNAGA**

- Site Address: 5420 Austin Park Trail, Cumming, GA 30040
- Superintendent: Robert Johnson | Phone: 404-555-0199 | Email: rjohnson@lennar.com

3. Drill into the Community and click + **Add Lot**:

- Lot Number: 000036
 - External ERP ID: SAP-LOT-LNXAUS-036
 - Physical Address: 5436 Austin Park Way
 - Elevation / Floor Plan: Plan 4200 - Cambridge Craft
-

Step 7: Configure Table Matrix Sub-Grids & Digital Form Templates

1. Open **Settings** → **Form Templates**:

2. Click + **Create Template**:

- Template Name: Superintendent Pre-Template & Install Sign-Off
- Bundle Category: Field Packet
- Offline PWA Compatible: Enabled

3. Add Fields & Sub-Grids:

- Header Section: Job Name, Lot Address, Superintendent Name, Target Install Date.
- Field Readiness Toggles: Cabinets Level [Yes/No], Power Active [Yes/No], Sinks on Site [Yes/No].
- **Table Matrix Sub-Grid**: Add SAP Configuration Sheet (ft_sap_config_sheet) :
 - Columns: Room / Area , Material Color , Edge Profile , Splash Ht , Cutout Qty .
 - Default Rows: Kitchen Perimeter , Island Waterfall , Master Bath Vanity .
- Sign-Off Section: Touch Signature Canvas, Signer Printed Name, Date Stamp.

4. Save and publish template to mobile crews.

Step 8: Create First Job, Allocate Slabs & Schedule Milestones

1. Open the **Jobs** tab and click + **New Job**:

- Job Name: LNXAUS_000036_000_01
- External ERP Order ID: SAP-SO-10170
- Link Account: LENNAR HOMES OF GEORGIA - 126954
- Link Community: AUSTIN PARK AT HIGHLAND (LNXAUS)
- Link Lot: 000036
- Job Category: INITIAL_INSTALL
- Target Install Date: Select date (e.g. 14 business days out).

2. Allocate Inventory Slabs:

- In Job Detail, select **Material Allocation**:
- Pick **Calacatta Gold Quartz 3cm** (2 slabs required).
- Allocate **SLB-ATL-2026-0041** and **SLB-ATL-2026-0099**.
- Notice status changes in inventory immediately from **Available** $\rightarrow$ **Allocated to Job SAP-SO-10170**.

3. Generate Scheduled Activities:

- Click **Apply Activity Template**:
 - SlabMaster automatically calculates lead times and schedules:
 - **Digital Laser Template** $\rightarrow$ Day 3 (Assigned to Crew 1 - Laser Tech).
 - **CAD Programming** $\rightarrow$ Day 5.
 - **CNC Sawjet Cutting** $\rightarrow$ Day 8 (Assigned to Sawjet Line 1).
 - **Field Installation** $\rightarrow$ Day 13 (Assigned to Install Crew 4).
 - **Superintendent Sign-off** $\rightarrow$ Day 13.
 - All activities populate onto the interactive Gantt Calendar.
-

Step 9: Test Shop Floor Kiosk Cut List & Field Mobile Tablet Sign-off

1. Shop Floor Kiosk Simulation:

- Open the **Shop Floor** tab (or station tablet at Sawjet Line 1).
- Filter by station: **Sawjet Line 1 (ATL)**.
- View **Job SAP-SO-10170** queued up.
- Click **Start Cut** $\rightarrow$ Timer starts; Slab barcodes **SLB-ATL-2026-0041** / **0099** verified.
- Click **Complete Cut** $\rightarrow$ Material status changes to **Cut / In Polish**. Activity marked **Complete**.

2. Field Mobile Tablet Simulation:

- Open **Forms** on field tablet (PWA offline mode verified).
 - Open **Superintendent Pre-Template & Install Sign-Off** packet for **Job SAP-SO-10170**.
 - Verify room measurements in the Table Matrix sub-grid.
 - Capture superintendent touch signature directly on glass.
 - Submit form $\rightarrow$ PDF packet automatically generated and attached to Job File history.
-

Step 10: Generate API Tokens & Establish Outbound ERP Synchronization

1. Open **Settings** $\rightarrow$ **API & ERP Integration**:

2. Click **Generate Live API Token**:

- Name: `SAP S/4HANA Production Bridge`
- Scopes: `read,write,sync,orders,wbs`
- Save the secret token (e.g. `sm_live_9f83a1b4c7e28910fedcba45`).

3. Hand the **SAP Developer Pack** (`/api-docs.html`) and **Postman Collection** (`/slabmaster_postman_collection.json`) to the ERP integration team.

4. Test outbound connectivity:

- Inspect the **Outbound ERP Retry Queue** table in Admin Portal.
- Verify that completed milestones (`SAP-WBS-10170-TMPL` , `SAP-WBS-10170-SAW`) generate queued payloads with automated progressive backoff (`Immediate → 1m → 5m → 15m → 1h`).
- Test the **"Retry Now"** manual recovery button on any mock failure items to ensure resilience.

Onboarding Complete!

The subscriber organization is now fully configured with operational multi-plant dispatch, live barcode slab inventory, scheduled production lines, offline mobile sign-offs, and enterprise ERP integration.
